

## DIRECTIONS FOR GETTING STARTED

It is important to make sure that your yo yo is adjusted to fit your height.

- 1) Hold the end of the yo yo string and let the yo yo drop to the floor. Mark a spot on the string about 4 inches above your waist.
- 2) Make a 1 inch loop at the end of the string (where you have marked it) and then pull all the string that is left through the loop. Now you have a slip knot.
- 3) Carefully cut the excess string that is left above the loop and now you are ready to play.
- 4) Depending on how tight you twirl the string around the axle, you can do many tricks. Some of the tricks may require the string to be looser, and others to be tighter.

You can do the following tricks with your yo yo:

- Around the world
- Rock the cradle
- Walking the dog
- Sleeping yo yo
- Many more that you can create by yourself.
